

Kyle, Year 7

When I was in Year 6 at Wyken Croft, I came to Stoke Park for the Year 6 friendship afternoon. We had some mini lessons, got to meet some teachers, and see what the classrooms were like.

Joining Stoke Park was a little bit scary but also fun and exciting. There are lots of students bigger than you, but being at secondary school makes you feel grown up.

The teachers make the lessons fun and really get the students involved. I'm particularly enjoying Science, because we do lots of practical work and experiments.

I also love English because I enjoy reading, and we get to do lots of it in our lessons.

There are so many ICT rooms around this school. This means you can spend some time at break or lunchtime working on your homework. You do get quite a lot of homework, but not too much, and it's fun because you use a website for it.

For example, in Maths this week, we were learning about averages. For homework we had to work out the mean and the mode of a series of numbers.
